

TO: K-12 Faculty

FROM: District-wide Leadership Team

RE: Scaffolding Essential Learning Experiences

Thank you for your work as a mentor or as a faculty friend at this year's Senior Exposition, our K-12 Celebration of Learning. To continually improve our system, we ask that you:

(1) Individually reflect to identify and describe one authentic task in your classroom that contributes to the development of the essential learnings necessary for each student to successfully complete Senior Exposition requirements:

(2) Share your individual reflection with your grade level team. Discuss your collective responses and how you could work together to strengthen your contribution to the development of our K-12 essential learnings.

(3) Turn in your work to your building-level principal. This information then will be used by the district-wide team to compare staff responses to the responses of seniors to the same question. Those results will be shared back with you to better inform our system-wide instruction toward our ultimate goal of competency in our school system's essential learnings.
